

ALIZA FATIMA

Computer Science Student · Aspiring Data Scientist & ML Engineer

faliza827@gmail.com | +92 371 4453130 | Multan, Pakistan | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Motivated Computer Science student at the University of Southern Punjab with strong foundations in C++, Python, web development, and database management. Passionate about pursuing a career in Data Science and Machine Learning Engineering. Demonstrated ability to build real-world software systems through independent and academic projects. Experienced in client-engineer relationship coordination through freelancing, with fast hands-on learning — particularly in database design and management. Eager to secure an internship where I can apply my technical skills and grow toward a future in ML and data-driven problem solving.

TECHNICAL SKILLS

- Languages: C · C++ · Python · JavaScript · HTML · CSS
- Databases: SQL · NoSQL · MongoDB · Oracle (hands-on, fast learner)
- Tools & IDEs: Visual Studio · Dev C++ · Canva · MS Office · Laragon · WordPress
- Core Concepts: OOP · Data Structures & Algorithms · Information Security · AI Fundamentals · Web Development
- Interests: Data Science · Machine Learning · Data Analysis · Predictive Modeling

PROJECTS

Hospital Management System | C++ · OOP

- Built an automated hospital management system to replace manual paper-based data entry processes
- Applied core OOP principles — classes, objects, inheritance, and encapsulation — to model real-world hospital workflows
- Managed patient records, staff data, and appointments through a structured and reusable C++ codebase

Student Learning Platform | HTML · CSS · JavaScript · Web Development

- Designed and developed a fully functional web-based learning platform for students
- Built an interactive and responsive frontend UI with a focus on clean layout and intuitive user experience
- Demonstrated practical skills in modern web technologies through end-to-end frontend development

TimeSync Management System | System Design · Advanced Database

- Developed a time and course scheduling management system for use in universities and office environments
- Enabled organized tracking of courses, tasks, and timelines to improve productivity
- Applied logical system design and problem-solving to deliver a practical scheduling solution

EXPERIENCE

IT Client–Engineer Liaison (Freelance, Third-Party) | IT Company · Part-time

- Worked as an intermediary connecting clients with engineers, without performing the technical work directly
- Built and maintained relationships between clients and engineers to facilitate smooth project engagements
- Coordinated deals between clients and engineers, earning a margin on successfully facilitated engagements
- Gained real-world experience in relationship building and client-facing coordination in the IT services space

EDUCATION

Matriculation | Nishat Girls High School

Intermediate | Punjab Group of Colleges

Bachelor of Science in Computer Science | University of Southern Punjab · Fall 2023 – Present

Relevant Coursework: Programming Fundamentals · Object-Oriented Programming · Database Systems · Advanced Databases · Data Structures & Algorithms · Information Security · Artificial Intelligence · Operating Systems · Computer Architecture · Web Design & Planning

CAREER GOAL

I am actively working toward becoming a Data Scientist and Machine Learning Engineer. My coursework in AI, databases, and algorithms — combined with hands-on project experience — is building a strong foundation for this path. I am seeking internship opportunities in data science, ML, or analytics where I can learn from professionals and apply my growing skillset to real-world problems.
